Build well Build faster ...for less

with **BUTLER** *buildings*

A trim all-metal Butler building or one distinctively custom-styled costs less than a traditional building of equal quality.

Butler buildings are mass-produced to hold down costs, yet precision-made to a degree not possible with traditional buildings.

They are erected quickly, saving time and money. Easy and economical to insulate, heat, ventilate, illuminate and maintain. For facts, call or write today.

Build well Build faster ...for less
with **BUTLER** *buildings*

A trim all-metal Butler building or one distinctively custom-styled costs less than a traditional building of equal quality.

Butler buildings are mass-produced to hold down costs, yet precision-made to a degree not possible with traditional buildings.

They are erected quickly, saving time and money. Easy and economical to insulate, heat, ventilate, illuminate and maintain. For facts, call or write today.

Please! Do Not Lend Your CITY DIRECTORY

•

IT COSTS YOU MONEY Every Time It is Loaned

•

The practice of lending your City Directory, in a great measure, is responsible for the increasing cost of Directory Service.

The reason is:—

There is a definite cost involved in the making of the **Directory** of Your City.

This cost must be absorbed by the subscribers—be they one—or be they 1000.

If there were but **One Subscriber** to the **City Directory — the One Subscriber** would of necessity have to absorb **The Whole Cost.**

If there were **1000 Subscribers**—each one would **have to absorb 1/1000 Part of the Whole Cost.**

From which it is obvious that the **Greater** the number of subscribers —the **Lesser** the cost to each.

Every time you loan your City Directory the **Less Necessity there is for the Borrower to subscribe for the Service.**

More Borrowers result in **Fewer Subscribers,** which means **Increased Cost.**

Metropolitan Winnipeg

Directory of Householders, Occupants of Office Buildings and Other Business Places, Including a Complete Street and Avenue Guide

1961

Copyright, 1961, by Henderson Directories Ltd. Winnipeg

In the following list the avenues and streets are arranged in alphabetical order, the intersecting streets are being shown. The number of each building on the street is given in numerical order, and opposite the number is placed the name of the occupants or houseowner or tenant. In the business blocks containing offices the occupants are shown by room numbers where practicable, in apartment homes the number denotes the number of the apartment. The Profession or business of individuals or firms is given only at their respective places of business; to find occupations of others refer to Alphabetical List of Names.

Where the odd and even numbers on an Avenue or Street are sparated, the north side (odd numbers) on Avenues will appear first and the east side (odd numbers) will appear first on Streets.

The symbol * following a householders name indicates that we have received information during the canvass that the house is owned by some member of the family, but as the publisher cannot and does not guarantee the correctness of the information furnished, nor the complete absence of mistakes no responsibility for errors can be or is assumed, nor can the publisher furnish further information than that shown.

The symbol Δ also following names denotes houses having telephones.

(This section includes some listings reading "Occupied" or "Vacant". In each case the Publishers tried diligently, by various means, to obtain the information for the occupants but were unsuccessful. First two personal calls were made by an enumerator; next, a post card was mailed and the telephone used when possible).

(The numerals that appear at right edge of columns, ahead of street descriptions and some street intersections, are merely for the guidance of the publishers, and have no other significance.

METHOD OF NUMBERING

Avenues generally run East and West and are numbered under 200 East of Main Street and over 200 West of Main. South of the Assiniboine River, Osborne Street is the base.

Streets generally run North and South and are numbered northwards from Notre Dame and both northwards and southwards from the Assiniboine River.

Odd Numbers generally on the north side of Avenues and east side of Streets.

Even Numbers are generally on the south side of Avenues and west side of Streets.

Postal Zone Numbers, when allocated, are shown at the start of each avenue or street. When an avenue or street runs into an adjacent zone the New Zone Number is indicated at the appropriate intersection.

Build well Build faster ...for less
with **BUTLER** *buildings*

A trim all-metal Butler building or one distinctively custom-styled costs less than a traditional building of equal quality.

Butler buildings are mass-produced to hold down costs, yet precision-made to a degree not possible with traditional buildings.

They are erected quickly, saving time and money. Easy and economical to insulate, heat, ventilate, illuminate and maintain. For facts, call or write today.

Build well Build faster ...for less
with **BUTLER** *buildings*

A trim all-metal Butler building or one distinctively custom-styled costs less than a traditional building of equal quality.

Butler buildings are mass-produced to hold down costs, yet precision-made to a degree not possible with traditional buildings.

They are erected quickly, saving time and money. Easy and economical to insulate, heat, ventilate, illuminate and maintain. For facts, call or write today.

Build well
Build faster
...for less
with BUTLER buildings

A trim all-metal Butler building or one distinctively custom-styled costs less than a traditional building of equal quality.

Butler buildings are mass-produced to hold down costs, yet precision-made to a degree not possible with traditional buildings.

They are erected quickly, saving time and money. Easy and economical to insulate, heat, ventilate, illuminate and maintain. For facts, call or write today.

Build well Build faster ...for less
with **BUTLER** *buildings*

A trim all-metal Butler building or one distinctively custom-styled costs less than a traditional building of equal quality.

Butler buildings are mass-produced to hold down costs, yet precision-made to a degree not possible with traditional buildings.

They are erected quickly, saving time and money. Easy and economical to insulate, heat, ventilate, illuminate and maintain. For facts, call or write today.

Build well
Build faster
...for less
with BUTLER buildings

A trim all-metal Butler building or one distinctively custom-styled costs less than a traditional building of equal quality.

Butler buildings are mass-produced to hold down costs, yet precision-made to a degree not possible with traditional buildings.

They are erected quickly, saving time and money. Easy and economical to insulate, heat, ventilate, illuminate and maintain. For facts, call or write today.
